Dear IZHAR OSWALDO ESCUDERO ORNELAS,

Title of Research: Real-Time Human Coordination and Predictive Maintenance in Multi-Agent Systems

Your application to the University for ethics approval to conduct Research Involving Human Participant, Survey Respondent or Personal Data has been reviewed and approved by the Ethics Review Panel(s). Apart from this approval, the research project might also require additional license/qualification/approval from relevant authorities. Please make sure that all required documents/approvals are obtained before research commences.

The present approval is only valid for the research activities outlined in the protocol and supporting documents submitted. Plans to deviate from the approved protocol and/or supporting documents must be submitted to, and approved by, the Ethics Review Panel(s) prior to the implementation of any changes.

You are required to report to the School Ethics Coordinator as soon as possible any issues regarding the occurrence of adverse events.

Sincerely,

Trevor Mahy, PhD
Chair, University Research Ethics Review Panel
